

## MAP Project Highlights

### Where:

Langdon Rural Water District (Cavalier, Ramsey and Walsh Counties) in North Dakota.

### Problem:

Funding compliance reporting.

### Solution:

MAP staff provided technical assistance for completing required budget and year-end management compliance reporting.

## Assistance helps district meet reporting requirements

Langdon Rural Water District serves approximately 2,700 residents and 930 connections within Cavalier, Ramsey and Walsh counties in the northeast corner of North Dakota, including 14 rural communities and two hog operations.

The district has received two water loans from Rural Development for financial assistance for community water projects. As a Rural Development borrower, Langdon is required to complete and submit an annual enterprise budget and a year-end management report.

This project was referred to MAP by the State Rural Development office for technical assistance in completing the required reporting, since neither the district secretary nor the director felt capable of completing it unassisted.

MAP staff worked one-on-one with the district secretary to complete both reporting requirements.

MAP staff received a letter from the State Rural Development Office stating that the district's budget and year-end management reporting had been approved as submitted, meeting all requirements as set forth in their loan/grant agreements.

While working with MAP staff during this project, the district secretary gained knowledge for completing future required reports.

MAP helps revitalize small communities and tribal nations in nine states by working with them to find solutions for their infrastructure, enterprise development, aging, technology, or training issues.

MAP is a member of the Rural Community Assistance Partnership. RCAP is a national network of regional nonprofit organizations that provide comprehensive, on-site technical assistance and training to help small, rural communities address their drinking water, wastewater, and other community development needs.
