Operator Certification: Course Number 2302285

What You Will Learn

This training will give you a general overview for practical knowledge of distribution system operators. You'll learn how to ensure water quality standards are continuously met. You will also tour a state of the art 10MGD water treatment plant.

MAP is an equal opportunity provider and employer and does not discriminate against qualified individuals with disabilities. We offer a wide variety of training one on one or class room style.

Check our website for a list of upcoming events or call our office to request a training in your area.
