

## Protect Well Water Quality

Unlike public drinking water systems, private wells do not have experts regularly checking the water's source and quality before it is sent to the tap.

Households that use private wells must take special precautions to ensure the safety of their drinking water.

"It would be fair to say that we didn't even know, what we didn't know in regards to well ownership, usage, and safety."

--Program Participant

## MIDWEST ASSISTANCE PROGRAM, INC.

Midwest Assistance Program, Inc. is a not for profit organization partnered with all of its affiliated organizations under the Rural Community Assistance Partnership (RCAP).

RCAP Partners on this program include University of Illinois, NEHA, NGWA, and four state well education programs (co-op extensions).
